Projects

Surion | Full-Stack Portfolio Management & Admin Portal

May 2026 - Jun 2026

- Built a MERN-stack portfolio website with a dedicated admin dashboard for dynamic content management and real-time updates.
- Integrated JWT-based authentication and protected routes to ensure secure access control for administrative operations.
- Designed RESTful APIs and implemented CRUD operations for projects, skills, certifications, and contact details, eliminating the need for manual code updates.

Sign Spell | Sign Language Translator Web App

Mar 2025 - Aug 2025

- Ranked in the top 1% of 50,000+ students in the Tamil Nadu State-Level Hackathon — Niral Thiruvizha 2025.
- Engineered the React.js frontend for a speech-to-sign web app with real-time UI updates, animation rendering, and responsive design.
- Integrated backend APIs and structured a scalable UI architecture to support future real-time avatar features.

FacelIntuit | Deepfake Detection Website

Aug 2024 - Nov 2024

- Implemented the complete frontend for a deepfake-detection web app submitted to the Smart India Hackathon 2024.
- Designed a responsive interface using HTML, JavaScript, and Bootstrap for smooth interaction across devices.
- Connected the UI with a Flask backend for model inference, coordinating closely with the ML team.
